

There are hundreds of film festivals around the world. However, only some of them have a strong identity – effective strategy and fulfilling philosophy. Even the concept of ‘festival’ has devolved and lost its essence.

A new event is to be introduced by MA NO FILMS in 2020 which will represent a synthesis of films and other art forms.

èVENTO

The essence of this event is in its uniqueness.

The title contains a code for freedom as ‘vento’ means ‘wind’. The wind can possess very opposing qualities such as burning, freezing or gentle.

There will be screenings of already renowned films as well as something less known but with a unique direction and approach.

Evaluation and appreciation of submitted films will materialize through the award ‘Fairy’ which will be given to the creators of the best foreign and the best Lithuanian films. The award comes with additional and very generous prizes. The judging panel will consist of renowned artist from the film industry.

Film won’t be the only artistic form exhibited in this event. Theatre and dance performances, music will also take part in it, providing an interesting synthesis.

There’s going to be more than one location. However, the opening place is the ancient island castle in a former Lithuanian capital – Trakai.
